How do I get started with Skype? | Skype Support

Skype is different from other VoIP (Voice over Internet Protocol) providers because it is a peer-to-peer service. This means that the program distributes the running workload across Skype users' computers via background processing, instead of running off a traditional server. It's part of why Skype is so inexpensive.

How to Use Skype | HowStuffWorks

You can also use Skype on your cell phone or TV, depending on the model. Apple products like iPhones, iPads and iTouches all have the ability to run Skype. Some cell phones running Android, as well as some models offered by Verizon Wireless (including Blackberrys, Android smartphones and other 3G phones), can run a special program called Skype ...
